

- Task 1.
- $\Pi \text{ Fname, Lname} (\text{Employee} \bowtie_{Ssn=Essn \text{ and } \text{Dependent_name} = \text{Fname}(\text{Dependent}))$
 - $\Pi \text{ Fname, Lname} ((\rho_{E1} (\text{Employee})) \bowtie_{E1.\text{Super_ssn} = E2.\text{Ssn} (\sigma_{E2.\text{Fname} = 'James' \text{ and } E2.\text{Lname} = 'Borg'} (\rho_{E2} (\text{Employee}))))$
 - $\Pi \text{ Fname, Lname} (\sigma_{Dno=5} (\text{Employee})) \bowtie_{Ssn=Essn} ((\sigma_{Pname = 'ProjectX'} (\text{Project})) \bowtie_{Pnumber = Pno (\sigma_{Hours > 10} (\text{Works_On})))$
 - $\Pi \text{ Pname, total_hours} \bowtie \text{Pnumber, Pname; SUM(Hours)} \rightarrow \text{total_hours} (\text{Project} \bowtie_{Pnumber = Pno \text{ Works_On})$
 - $(\Pi \text{ Fname, Lname} (\text{Employee} \bowtie_{Ssn=Essn} (\text{Works_On}))) \div (\Pi \text{ Pno} (\rho_{Pno} \leftarrow \text{Pnumber}(\text{Project})))$
 - $(\Pi \text{ Fname, Lname} (\text{Employee})) - (\Pi \text{ Fname, Lname} (\text{Employee} \bowtie_{Ssn=Essn} (\text{Works_On})))$
 - $\Pi \text{ Dname, avg_salary} \bowtie \text{Dnumber, Dname; AVG(Salary)} \rightarrow \text{avg_salary} (\text{Employee} \bowtie_{Dno=Dnumber} \text{Department})$
 - $\Pi \text{ avg_salary} \bowtie; \text{AVG(Salary)} \rightarrow \text{avg_salary} (\sigma_{Sex = 'M'} \text{Employee})$
 - $(\Pi \text{ Fname, Lname, Address} (\text{Employee} \bowtie_{Ssn=Essn} ((\sigma_{Location = 'Stafford'} (\text{Project})) \bowtie_{Pnumber = Pno} \text{Works_On}))) - (\Pi \text{ Fname, Lname, Address} (\text{Employee} \bowtie_{Dno=Dnumber} (\text{Department} \bowtie_{Location = 'Stafford'} (\text{Dept_Locations}))))$
 - $\Pi E2.\text{Lname} (\sigma_{\text{Dependent_name} = \text{null}} ((\rho_{E1} (\text{Employee})) \bowtie_{E1.\text{Super_ssn} = E2.\text{Ssn}} (\rho_{E2} (\text{Employee})))) \bowtie_{E2.\text{Ssn} = \text{Essn}(\text{Dependent}))$

Task 2. $B = 512B$ $G = 128B$ $N_{\frac{B}{2}} = 20$ $N_{\frac{1}{2}} = 400$ $\text{pack} = 30d$

- $\text{C}_{\text{total}} = (B + G) N_{\frac{B}{2}} \cdot 12.8 \text{ kB}$
 $\text{C}_{\text{useful}} = B N_{\frac{B}{2}} = 10.24 \text{ kB}$
- $N_{\text{cylinder}} = N_{\text{tracks}} = 400$
- $\text{C}_{\text{total}} = (B + G) N_{\frac{B}{2}} \text{ pack} = 384 \text{ kB}$
 $\text{C}_{\text{useful}} = B N_{\frac{B}{2}} \text{ pack} = 307.2 \text{ kB}$
- $\text{C}_{\text{total}} = (B + G) \times N_{\frac{B}{2}} \times N_{\frac{1}{2}} \times \text{pack} = 153.6 \text{ MB}$
 $\text{C}_{\text{useful}} = B \times N_{\frac{B}{2}} \times N_{\frac{1}{2}} \times \text{pack} = 122.88 \text{ MB}$

Task 3. 1. capacity = 3 2. capacity = 4
